**UNIVERSAL BOARDING DEVICE**

**LIFT-A-LOFT**

*An Industry Leader for 50 Years*

# — U B D —

The Universal Boarding Device is designed to meet an airline industry need for a portable aircraft-boarding device that may be used by both able-bodied and disabled passengers when terminal access is unavailable or undesirable.

## DIMENSIONS & CAPACITIES

- Platform Heights:
  - 56" (1.42 m)
  - 66" (1.68 m)
  - 96" (2.44 m)
- Accessible Door Sill Height  
15" (0.38 m) Above or Below Listed Platform Heights
- Custom Design is Available for Higher Boarding Requirements

## PERFORMANCE SPEC.

- Lift Capacity – 600 lbs.  
(272.2 kg)
- Heavy-duty swivel casters for positioning of unit.
- Ground to platform passenger lift is large enough to accommodate a full size wheel chair including an attendant.

## FEATURES

- Simultaneous Boarding – The combination stairway and lift device allows for simultaneous boarding of both able and disabled passengers in a comfortable, dignified manner.
- Non-Slip Surface on Areas That Receive Foot Contact

## UBD SAFETY

- Non-Slip Flooring
- Locking mechanism prevents unit from moving when placed in proper position and activated
- Meets all ANSI, ADA, and Advisory Circular Standards
